

Connectpoint® 38" Display (CP-38D LED)

38" Outdoor LED Display

The CP-38 offers a full-color solution with double-sided screens, high brightness, daylight readability as well as high image quality. It is specifically engineered for environments that require a rugged and durable digital display, making it ideal for the public transit industry.

The CP-38 is programmed for each individual agency's needs for next departure transit information, ridership alerts, advertisements and video. It can be ordered with a simple mounting bracket, complete wall enclosure or canopy mount.

System health, power and content are managed by Connectpoint's cloud-based asset management system, CPAM™, which can be accessed from any mobile device for on-the-go changes and performance visibility.

CP-38 Specifications
